

Special Issue

Energy Challenges and Smart Applications in Production Systems

Message from the Guest Editors

Energy consumption and deliveries are currently some of the greatest challenges of civilization. Society is becoming more and more aware of the scarcity of natural resources, the impact of climate change, and the importance of smart solutions for rational use of energy.

Energy efficiency in manufacturing cannot be achieved without changes in paradigms and underlying technologies and applications. The role of smart solutions in this area is huge.

The development of Industry 4.0 and artificial intelligence (AI) provides many promises in the field of energy saving. Smart solutions offer manufacturing many benefits (reducing emissions, energy consumption, costs, and better customer service, and others). Industry 4.0 and AI play a key role in the success of smart applications for energy efficiency.

The purpose of this Special Issue is to promote and disseminate new trends and advancements in Industry 4.0 and AI supporting energy efficiency in manufacturing systems, and sustainable energy.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
