Special Issue

Energy Consumption in a Smart City

Message from the Guest Editors

This Special Issue welcomes original multidisciplinary research works about AI, data science methods, and their integration with existing design/decision-making processes in the domain of energy consumption in a Smart City. Topics of interest include but are not limited to:

- New data sources for energy consumption modeling in a Smart City;
- Novel computational methods and applications to support data-driven energy planning and policymaking in a Smart City;
- Tools and applications to engage with the citizen to either raise awareness on energy consumption or involve them in the decision-making process;
- Use cases;
- Smart architecture of the energy systems.

Guest Editors

Dr. Andrea Mauri

1. Faculty of Industrial Design Engineering, Delft University of Technology, 2628 XE Delft, The Netherlands
2. Quantia Consulting, 22066 Mariano Comense, Italy

Dr. Benedetto Nastasi

Department of Planning, Design & Technology of Architecture, Sapienza University of Rome, Via Flaminia 72, 00196 Rome, Italy

Deadline for manuscript submissions

closed (30 June 2022)

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
