

## Special Issue

# New Challenges in Energy and Environment

### Message from the Guest Editors

This special issue looks forward to embracing business and policy efforts for energy and environmental protection along with recent deregulation on energy outputs (e.g., electricity). Deregulation is a global trend in energy sectors and important for sustainable development. In contrast, environmental regulation is important in preventing various pollutions. We would like to see applications that measure how new technology assessment and development (e.g., smart city design/development, clean coal technology and shale oil/gas) can enhance energy efficiency, resource utilization, energy policy and other concerns on sustainable development (e.g., global warming and climate change). We also welcome new methodological developments in computer science (e.g., AI: artificial intelligence) and management science (e.g., DEA: data envelopment analysis) that discuss the energy and environmental challenges.

### Guest Editors

Prof. Dr. Toshiyuki Sueyoshi

1. The Center for Economic Research, Shandong University, Jinan 250100, China
2. School of Environment and Society, Tokyo Tech World Research Hub Initiative, Tokyo Institute of Technology, 3-3-6 Shibaura, Minato-ku, Tokyo 108-0023, Japan

Prof. Dr. Mika Goto

Tokyo Institute of Technology, School of Environment and Society, 3-3-6 Shibaura, Minato-ku, Tokyo 108-0023, Japan

### Deadline for manuscript submissions

closed (15 August 2021)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
