

Special Issue

Smart Energy and Intelligent Transportation Systems

Message from the Guest Editors

This Special Issue seeks to contribute to the smart energy and intelligent transportation system agenda through enhanced scientific and multi-disciplinary knowledge to improve performance and deployment by bringing some focus to electric and autonomous vehicles in order to meet technical, socio-economic, and environmental goals, as well as for energy security. We are particularly interested in investigating how smart energy technologies contribute to intelligent transportation systems, and vice versa. We therefore invite papers on innovative technical developments, reviews, and analytical as well as assessment papers from different disciplines which are relevant to the integration of smart energy and mobility.

Guest Editors

Prof. Dr. Albert Y.S. Lam

Prof. Dr. Bogusław Łazarz

Prof. Dr. Grzegorz Perun

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
