

Special Issue

Pipeline Safety and Integrity Management under the Context of Energy Transition

Message from the Guest Editors

The global energy sector is shifting from fossil fuel production and consumption to renewable or clean energy sources, such as wind, solar, hydrogen, nuclear, biomass, etc. Decarbonization is part of the aim of this energy transition. Pipelines, a critical energy-transportation infrastructure, continue to play an essential role in the updated energy sector. Most transported medium poses new threats and risks to pipeline safety and integrity during the operation. Therefore, it is imperative to take active actions to address the challenges associated with pipeline deterioration induced by clean energy transmission and carbon removal. To provide a platform for such discussions, the present special issue aims to bring together scholars committed to the theme of pipeline safety and integrity management under the context of energy transition to present their latest accomplishments and study findings. This special issue will serve as an important resource, providing individuals with knowledge and a comprehensive understanding of potential difficulties connected to a sustainable, safe, and resilient energy pipeline industry in the new energy era.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
