

Special Issue

Energy Policy and Policy Implications 2020

Message from the Guest Editors

Energy is essential to enabling the global economy to function adequately. However, its production and consumption can also have adverse effects. Energy policy is aimed at achieving objectives related to economic growth, environmental impact, and national security. In recent years, due to exponential population growth, increased per capita energy consumption, and greater impact on the environment, energy policy is facing major additional challenges. The Special Issue “Energy Policy and Policy Implications” is meant to address a wide spectrum of issues related to these challenges. Researchers are invited to submit manuscripts showing how their research results contribute to solving the current and foreseeable problems that arise from the current dynamics in the energy field. Energy policies designed to deal with the global economy and focusing on geopolitical influences as well as energy policies related to more limited geographical circumscriptions (regional, national or local) can be suitable topics of research. Innovative aspects of the new energy policies should be stressed.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
