Special Issue

Energy Supplies in the Countries from the Visegrad Group

Message from the Guest Editor

The Visegrad Group (V4) is an association of four Central European countries - Poland, the Czech Republic, Slovakia, and Hungary. The group aimed to deepen cooperation between these countries, and, in the initial phase, in particular, concerning accession to the structures of the European Union and NATO. This issue welcomes papers relating to energy supply in the Visegrad countries. Studies can cover both macroeconomic and microeconomic aspects. It is important to define how the V4 countries cope with energy management, how they have undergone or are going through the energy transformation, and in which direction they are going. The articles may concern aspects of the use of energy sources, energy security, social and economic aspects of energy, the impact of energy consumption on the environment, and modern solutions in the energy sector. It is also possible to present a comparison of changes in the energy situation in the V4 countries compared to other European countries, both economically developed and developing.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
