

Special Issue

Energy Transition and Environmental Sustainability

Message from the Guest Editors

Environmental sustainability for the energy industry, and especially oil and gas, is of great concern for governments and policy makers. The demand for oil and gas remains high, and policies are required to reduce the demand for these non-renewable resources to more sustainable forms of energy. Sustainability is now at the centre of strategy and investment decisions, with major investments being made towards renewable energy. This Special Issue of *Energies* seeks to attract articles on policy, law, and taxation that address the opportunities of energy transition that are sustainable as well as economically and socially acceptable. We encourage the submission of articles that explore issues involved in advancing the oil, gas, and renewable energy community in order to meet the world's energy demand in a safe, environmentally responsible, and sustainable manner.

Guest Editors

Prof. Dr. Prafula Pearce

School of Business and Law, Edith Cowan University, Joondalup, WA 6027, Australia

Prof. Dr. Tina Soliman Hunter

School of Law, University of Aberdeen, Aberdeen, Scotland AB24 3FX, UK

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
