

Special Issue

Fluid Machinery, Systems and Storage Technologies for Clean and Sustainable Energy Generation

Message from the Guest Editors

The articles in this Issue will be concerned with one of the most important sectors of the global economy: the production of energy for humanity. Energy production, efficiency, storage, and transportation have been topics of interest since the steam age, since they correspond to the power of nations. At present, with the increasing global emphasis on emissions reduction, global warming, and energy security and sustainability, these subjects has never been more important.

Guest Editors

Prof. Dr. Riccardo Amirante

Dr. Paolo Tamburrano

Dr. Elia Distaso

Prof. Dr. Pietro De Palma

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
