

## Special Issue

# Solar and Wind Energy Forecasting

### Message from the Guest Editors

The journal *Energies* (ISSN 1996-1073, IF 2.262) is currently running a Special Issue entitled "Solar and Wind Energy Forecasting". and (Politecnico di Milano, Milano, Italy) are serving as for this issue. We think you could make an excellent contribution based on your expertise. The renewable-energy-based generation of electricity is currently experiencing rapid growth in electric grids. The intermittent input from the renewable energy sources (RES) as a consequence brings problems in balancing the energy supply and demand. Thus, forecasting of RES power generation is vital to help the grid operators to better manage the electric balance between power demand and supply, and to improve the penetration of distributed renewable energy sources and, in stand-alone hybrid systems, for the optimum size of all its components and to improve the reliability of the isolated systems. This Special Issue of *Energies*, "Solar and Wind Energy Forecasting", is intended for disseminating new promising methods and techniques to forecast the output power and energy of intermittent renewable energy sources.

### Guest Editors

Prof. Dr. Sonia Leva

Department of Energy, Politecnico di Milano, 20156 Milan, Italy

Dr. Emanuele Ogliari

Department of Energy, Politecnico di Milano, 20156 Milan, Italy

### Deadline for manuscript submissions

closed (20 December 2018)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
