Special Issue

Fuel Consumption of Hybrid Vehicles

Message from the Guest Editor

The role of electrification in the powertrain and in the whole vehicle is increasing. It affects the energy consumption of the cars. Hybridisation, plug-in hybrids, alternative fuels and propulsions all affecting the fuel/energy consumption and with the increasing autonomy of the vehicles, they have a more-and-more effect not only on fuel consumption prediction and refuelling planning but on vehicle emissions as well. The Special Issue aims to collect the state of the art research results in this field.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:
CiteScore - Q1 (Control and Optimization)
