

Special Issue

The Future of Smart Local Energy System

Message from the Guest Editors

The Special Issue "[The Future of Smart Local Energy System](#)" seeks original, scholarly contributions that seek to explore novel approaches to understanding energy system transitions through a “smart” and “local” lens.

These contributions, in the context of smart local energy systems, can be empirical, theoretical, or methodological in nature, or develop novel methods and approaches that explore one or more of:

- Technology;
- Policy and regulation;
- Markets;
- Business models;
- Investment strategies;
- End users;
- Sociocultural aspects of behaviour and lifestyle.

Approaches that prioritise interdisciplinary and/or integrative research traditions will be particularly welcome.

Guest Editors

Prof. Dr. Malcolm McCulloch

Department of Engineering Science, University of Oxford, Oxford, UK

Dr. Rebecca Ford

School of Government & Public Policy, University of Strathclyde, Glasgow, UK

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
