

## Special Issue

# Heat Transfer in Energy Conversion Systems

### Message from the Guest Editors

Papers that analyze aspects related to heat transfer, useful for increasing the knowledge of energy conversion systems, on the basis of one or more of the following topics are welcome:

- Energy sources and energy conversion systems
- Thermodynamic and thermo-economic analysis of energy systems
- Technologies for renewable energy sources
- Heating and air conditioning systems
- Solar thermal and photovoltaic
- Cogeneration
- Energy saving
- Geothermal energy-based systems
- Waste to energy systems
- Fuel cells
- Heat exchangers/heat pipes
- Heat transfer in porous media
- Heat transfer in indoor environments
- Internal flow and heat transfer
- Multi-phase flows.

Please note that the above list is not exhaustive. Therefore, works focused on other research areas that are relevant for this Special Issue are also appreciated.

---

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba  
Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
