

Special Issue

Heat Exchangers for Thermoelectric Devices

Message from the Guest Editor

This Special Issue welcomes cutting-edge research in the form of analytic and numerical models and algorithms focusing on thermal-fluid-electric coupled modeling of thermoelectric generators, optimization methods for heat exchangers applied to thermoelectric generators considering thermal-fluid-electric coupling, and the applications thereof to system-level or novel waste heat recovery systems.

Guest Editor

Dr. Matthew Barry

Mechanical Engineering & Materials Science Department, University of Pittsburgh, 3700 O'hara Street, Pittsburgh, PA 15261, USA

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
