

Special Issue

Heat Transfer in Solar Collector

Message from the Guest Editors

Heat transfer analysis in solar collectors plays a tremendous role in the field of solar energy utilization. The **Special Issue** invites papers that focus on improving solar energy utilization to demonstrably reduce carbon emissions. Both research and review papers are encouraged. Research interests include but are not limited to the following list: 1) Solar energy storage; 2) Solar collector design; 3) Heat transfer modeling; 4) Photothermal conversion; 5) Inverse heat transfer analysis.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
