

Special Issue

Hydrocarbons in Global Energy

Message from the Guest Editors

This issue focuses on providing the reliable information required by the energy community under pressure from the transformation of the global energy system. The main topics up for discussion in submissions include but are not limited to the following: (1) Hydrocarbon origin. This question is still one of the main questions for the petroleum industry; (2) Hydrocarbon reserves. How much oil and natural gas do we have? (3) Hydrocarbons and CO₂ emissions. New technologies to safely capture and store CO₂ to mitigate the use of hydrocarbons; (4) Paradigm shift on the global energy market: natural gas dominated; (5) Barriers and driving forces in the petroleum industry; (6) Offshore hydrocarbons projects, Arctic projects.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.
