Special Issue

Innovations in Renewable Energy Technologies and Energy Efficiency: Roadmap to Attaining Carbon Neutrality

Message from the Guest Editors

The purpose of this special issue is to provide a platform for the discussion of recent advances and innovations in renewable energy technologies and energy efficiencies. It is expected that leading research that focuses on innovative design and applications of renewable energy technologies and energy efficiency will be discussed by renowned researchers. The scope of the special issue includes the following:

- Innovations in Renewable electricity generation: Solar PV system, Wind turbines, etc.
- Innovations in Biofuel production technologies
- Innovations in hydrogen production technologies
- Innovation in Renewable heat and Energy Efficiency
- Energy Policies and Green Financing innovations

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
