

## Special Issue

# Internal Environment and Thermal Performance of Buildings

### Message from the Guest Editors

We believe that each analysis carried out within the above-mentioned areas in different types of buildings should show the impact of research on thermal performance of buildings. We encourage you to submit research, simulation or review works focused on the broadly understood energy efficiency and internal environment in Buildings. Works related to are especially welcomed:

- indoor and outdoor air quality,
- thermal comfort in buildings,
- thermal performance of buildings - methods, case studies, comparisons,
- use of Renewable Energy Sources (RES),
- heat recovery technologies,
- HVAC systems (heating, ventilation and air conditioning),
- passive techniques for heating/cooling,
- energy-oriented control systems,
- the impact of building use on energy consumption,
- the impact of indoor and outdoor air quality on energy consumption,
- climate and internal environment,
- sources of heat, cold and energy - the possibility of reducing the demand,
- building assessment,
- decision support in the field of thermal performance.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
