

Special Issue

Optimal Investment Analysis of Renewable Energy

Message from the Guest Editor

This Special Issue of *Energies* aims to identify the key issues in optimal investment analysis of renewable energy from a range of multidimensional aspects. Scholars are encouraged and invited to contribute and thus promote the importance of optimal renewable investments research in revealing the motivations for investing in renewable energy, resources available for investments in renewable energy, risk analysis of the investments of renewable energy, choices of renewable energy sectors, and all other relevant implications. Theoretical and empirical research in renewable energy with the aim of reducing global environmental degradation, especially in the form of greenhouses gases, are particularly welcome.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
