

## Special Issue

# Biofuels Production from Lignocellulosic Waste

### Message from the Guest Editors

*Energies*, a peer-reviewed open access journal on science and technology related to energy and environmental issues, plans to publish a Special Issue titled '**Biofuels Production from Lignocellulosic Waste**'. The main aim of this Issue is to serve scientists and engineers active in the fields of methane and hydrogen production, fermentation and lignocellulosic waste pretreatment, etc. The scope of the Special Issue includes results of biochemical science, analytical techniques, theoretical and computational methods, pretreatment methods and biotechnologies.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.
