

Special Issue

Low Carbon Transition for a Green Future

Message from the Guest Editors

The objectives of this Special Issue will be on where the whole world shall go for low-carbon transition, and how countries or regions would find the economically feasible pathways. We welcome papers on both theoretical and empirical research topics, including but not limited to:

- Technology potential, key policy options, and feasibility analyses;
- Clean investment: Climate policy incentives and long-run returns;
- Green investment and green consumption;
- Environmental regulation and socioeconomic development;
- Energy, environmental, and economic sustainability in emerging economies;
- Outsourcing and spillovers of green innovation towards green future;
- Collaborative or non-collaborative paths of climate governance;
- Resource constraints for energy restructuring and green future;
- Role of technology options in economic inequality and poverty.

Guest Editors

Prof. Dr. Hongbo Duan

Dr. Xiuting Li

Prof. Dr. Yi Hu

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
