

Special Issue

Negawatt Trading in the Energy Market: Implementation Challenges and Prospects

Message from the Guest Editors

In this Special Issue, the challenges and potential of establishing negawatt trading mechanisms in today's energy market will be addressed. The exploration of recent technological advances (e.g., artificial intelligence, distributed ledger, grid-interactive buildings, 5G technologies in the efficient deployability of negawatt trading). We aim to provide a multidisciplinary view of the possibility of negawatt trading in energy markets, which will eventually help to improve smart grids' energy efficiency.

Guest Editors

Prof. Dr. Vijayakumar Varadarajan

Prof. Dr. Kapil Sharma

Prof. Dr. Mukhtiar Singh

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
