# A New Water-Energy Nexus: The Transition to Sustainable Energy ☒

### Message from the Guest Editor

This Special Issue, entitled “A New Water-Energy Nexus: The Transition to Sustainable Energy ☒”, focuses on this very interesting and promising prospect of exploiting the energy of water in a sustainable way with respect to the water-energy nexus. We seek papers presenting new research proposals or the development and improvement of existing ones, including innovative case study applications. The topics of interest may include but are not limited to the following:

- clean energy
- hydropower
- renewable energy sources
- water resource management
- sustainable development

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.
