

## Special Issue

# Towards Stable Operation and Control of New Energy Power System

### Message from the Guest Editor

Achieving stable operation of control systems and new energy power systems is among the biggest challenges that still need more reliable, adaptive, and integrated solutions to confront day-to-day problems. Emerging technologies can definitely introduce an evolution supporting such systems in many aspects. This Special Issue aims to group all the alternative paradigms that are being developed toward a stable operation of control systems and new energy power systems. These include, though not exclusively:

- Smart grids;
- Optimization;
- Renewable energy;
- Power systems;
- Control systems;
- Systems security;
- Artificial intelligence.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
