

## Special Issue

# Outdoor Insulation and Gas Insulated Switchgears

### Message from the Guest Editors

With the growing world's population and faster developing industries, larger amounts of electric energy are needed. Many ultra/extra AC/DC high voltage transmission projects have been commissioned or are under construction in many countries. Understanding the fundamental aspects on outdoor insulation is, therefore, important for properly designing practical HV transmission lines. The Special Issue will cover theoretical and practical developments with special emphasis on engineering problems in designing and monitoring of AC/DC high voltage transmission lines and solutions to mitigate atmospheric conditions influence. The applications of new materials in the novel design of transmission line hardware and perspectives are also concerned. Topics of interest for special issue include, but are not limited to:

- Lightning phenomena and related applications
- Long air gap discharges
- Switching surges
- Insulation coordination
- Breakdown and pre-breakdown phenomena in gases
- Insulating material efficiency improvement by chemical admixtures
- Gas insulated switchgears (GIS)
- Measurement, monitoring and diagnostic techniques

---

### Guest Editors

Prof. Dr. Issouf Fofana

Aging of Oil-Filled Equipment on High Voltage Lines (ViAHT),  
Department of Applied Sciences, Université du Québec à Chicoutimi  
(UQAC), Chicoutimi, QC G7H 2B1, Canada

Prof. Dr. Stephan Brettschneider

International Research Center on Atmospheric Icing and Power  
Engineering (CENGIVRE), Université du Québec à Chicoutimi (UQAC),  
Department of Applied Sciences, 555, Boulevard de l'Université,  
Chicoutimi, QC G7H 2B1, Canada

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
