

Special Issue

Power Electronics and Power Quality

Message from the Guest Editor

Electric power systems are experiencing new challenges: the distributed generation, the integration of renewable energy systems, the widespread of plug-in electric and hybrid-electric vehicles, the electrification of railway systems, the distributed control in smart grids, and the interconnected or islanded operation of microgrids brings to a higher level the importance of power quality. This scenario stimulates the research and development in monitoring technologies and power electronics solutions to ensure the power quality of the future power systems.

This Special Issue of *Energies* collects and disseminates the latest advances in “Power Electronics and Power Quality”, namely in terms of: advanced power quality monitoring; active power conditioners for power quality improvement; power quality in smart grids and microgrids; energy storage systems with power quality ancillary services; electric vehicle battery chargers with smart operation modes; integration of renewable energy systems with power quality ancillary services.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
