

Special Issue

Power Electronics and AC Machine Drive System

Message from the Guest Editor

As automation is highly expanded in industrial processes for a variety of applications, power electronics and the design of a high-performance AC machine drive system are becoming major concerns in the development of industrial systems. Currently, power electronics and AC machine drive systems are employed in lots of areas, such as industrial processes, consumer electronics, electric vehicles, and electric power generation. This Special Issue will focus on power electronics and the AC machine drive systems they are connected to. Studies regarding all different areas of power electronics and AC drive systems are invited, which include power conversion of renewable energy, electric vehicle, microgrid, digital control of AC machine drive system, DSP-based digital controller design, and robust/nonlinear control of AC machine drive system. Both theoretical and experimental works are welcomed.

Guest Editor

Prof. Dr. Kyeong-Hwa Kim

Department of Electrical and Information Engineering, Seoul National University of Science and Technology, Seoul 01811, Republic of Korea

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
