

Special Issue

Underground Pumped Storage Plants

Message from the Guest Editors

This Special Issue will address research on the hydraulic and machinery design, the geology, the public acceptance, the environmental impact, the operation modes, the legal regulation, and the economic efficiency of underground pumped storage plants. We would also like to invite authors to address the global potential for expanding underground pumped storage plants and to demonstrate specific case studies.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.
