

Special Issue

Latest Research in Renewable Energy for Sustainable Development

Message from the Guest Editor

The consumption of energy in all forms has been steadily rising all over the world. Many researchers are widely working to fulfil energy requirements via renewable-energy-based energy resources including hydropower, solar, wind, geothermal and biomass energy. Many advancements are being made for the betterment of technological improvements in terms of sustainability, energy conversion, etc. Computing techniques are also playing a vital role in maximizing energy generation. The aim of the present Special Issue is to cover the integration of various technological advancements in the field of renewable energy technologies for sustainable development. The of this Special Issue therefore encourage both academic and industrial researchers to present their latest findings concerning the technological advancement in the field of renewable energies.

- biomass and bioenergy
- hydropower
- solar photovoltaic energy
- solar thermal energy
- wind energy

Guest Editor

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
