

Special Issue

New Innovation of Smart Grid in Complex Systems: Design, Technology, and Optimization

Message from the Guest Editors

The is inviting submissions to a Special Issue of *Energies* entitled New Smart Grid Innovation in Complex Systems: Design, Technology, and Optimization. The energy systems form smart grids, so studying their elements, interactions, and structure as complex systems has necessitated innovative methods to control, manage, and optimize them. Many techniques and theories for smart grids have emerged in recent years. Moreover, artificial intelligence and multiagent systems are interesting topics to address the key challenges faced by smart grids, including forecasting, hybrid energy integration, vehicles to grid management, smart home management, and so on. This Special Issue will deal with novel modeling, simulation, optimization, and management techniques for smart grids. Topics of interest for publication include, but are not limited to: Smart grids; Complex systems; Energy systems; Hybrid energy systems; Artificial intelligence; Optimization techniques; Big Data; Multiagent models; Multiagent simulation.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
