

Special Issue

Smart Buildings for a Sustainable Future

Message from the Guest Editors

This Special Issue is open for submission now.

Manuscripts combining experimental implementation with theoretical calculations and technoeconomic assessment are welcome. Potential topics include but are not limited to:

- Emerging materials for thermal energy management;
- Smart buildings;
- BIM models;
- Digital building twin;
- Near-zero energy buildings (nZEBs) and zero energy buildings (ZEBs);
- Advanced insulation materials, components, and systems;
- Modeling of advanced materials and technologies in buildings;
- Life cycle assessment (LCA);
- Additive and advanced materials manufacturing/3D printing;
- Sustainable, resource-efficient, and low-carbon technologies in energy-intensive environments;
- Technologies enabling energy-efficient, low environmental impact buildings and systems.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.
