

Special Issue

Solar Thermal Energy for Net Zero Energy Buildings

Message from the Guest Editors

To further spread the technologies and methods related to solar thermal energy systems towards NZEBs, this Special Issue, entitled “Solar Thermal Energy for Net Zero Energy Buildings”, has been proposed for the international journal *Energies*, which is an SSCI and SCIE journal. This Special Issue mainly covers original research and studies related to the above-mentioned topics, including, but not limited to, solar thermal collectors, concentrating solar collectors, building-integrated photovoltaic/thermal collectors (BIPV/T), solar-assisted heat pumps, passive solar energy technologies, Trombe walls, solar-driven energy storage, waste heat recovery systems, and so on. Papers nominated for this Special Issue are subject to a meticulous peer-review process with the goal of fast and effective dissemination of research results, developments, and applications.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
