

Special Issue

Solar Thermochemical Production of Material Commodities

Message from the Guest Editors

We are pleased to invite you to submit high-quality unpublished contributions on recent advances in applications of concentrated solar radiation to high-temperature industrial processes with a strong potential to contribute to the decarbonization of the world's economy. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not be limited to) the following:

- Solar thermal production of commodities; i.e., cement, lime, steel, pure metals, bulk chemicals, etc.;
- Thermochemical production of hydrogen and other solar fuels;
- Solar processing of materials at high temperature.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
