

## Special Issue

# Sustainable Innovations in Energy Entrepreneurship

### Message from the Guest Editors

Energy production and consumption are responsible for a considerable part of greenhouse-gas emissions and climate change. Most of these energies come from fossil sources. Rapid and far-reaching change from fossil energy to renewable energy can significantly contribute to sustainability (IPCC report, 2018).

Sustainable entrepreneurial initiatives in the green energy sector through sustainable innovations can serve as examples of how entrepreneurs and ventures can alleviate the externalities created by energies and resource exploitation (Johnson and Schaltegger, 2020). Such innovations have attracted increasing interest in the transition toward sustainability at multiple levels (international, national, regional, sectorial, organizational, individual). However, designing, creating, and managing such sustainable innovations can be a challenge for engineers, entrepreneurs, managers, and governments. The purpose of this Special Issue is to encourage and mobilize researchers to prompt enriching debates, exchange useful information, and provide transferable knowledge around sustainable innovations in energy entrepreneurship.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
