

Special Issue

Technology and Strategy for Sustainable Energy Systems

Message from the Guest Editor

Various researchers have focused on the challenges surrounding the realization of complex energy systems, mostly from an engineering perspective. This Special Issue focuses on the management of sustainable energy systems and calls for research on energy systems that take a social science perspective. Topics include but are not limited to:

- Standardization related to energy systems;
- Diffusion and adoption of energy technologies;
- Management of emergent and disruptive energy technologies;
- Technology and sustainability in energy systems;
- Management of energy technologies in developing countries;
- Waste to energy systems;
- Energy systems and social sustainability;
- Innovation in energy systems;
- Risk in energy systems;
- Technology and strategy for wind and solar energy systems;
- Public policy related to the implementation of sustainable energy systems.

Guest Editor

Prof. Dr. Paulo Antônio Zawislak

School of Management, Federal University of Rio Grande do Sul, Porto Alegre - RS 90040-060, Brazil

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
