## **Special Issue**

## Waste-to-Wheel Approach for Future Renewable Drop-In Fuel Development

### Message from the Guest Editor

Dear colleague, The International Energy Agency envisages that advanced renewable fuels will contribute significantly to reducing emissions by increasing from 5% of total transport energy supply today to up to 30% by 2050. This Special Issue aims to encourage researchers to address the technological advancements that have led to the development of novel approaches in conversion and production of advanced renewable drop-in fuels from the perspective of the waste-to-wheel approach. We are looking for contributions in the following areas:

- thermochemical and biochemical methods for renewable fuel production;
- cost-effective methods of pre-treatment and processing of biogenic residue and waste for renewable fuel production;
- techno-economic and environmental analysis of advanced renewable fuels:
- renewable fuel supply, distribution, and storage;
- vehicle and engine performance and emissions using advanced renewable fuels.

### **About the Journal**

### Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

### Journal Rank:

CiteScore - Q1 (Control and Optimization)
