

Topical Collection

Women in Hydrogen Energy

Message from the Collection Editors

The Special Issue is dedicated to gathering and promoting the outstanding research works and studies led or carried out by women scientists. This Special Issue invites contributions to the latest research and developments in hydrogen energy, addressing the advancement of hydrogen technologies and infrastructure, as well as the establishment of hydrogen as an integral and significant part of future energy scenarios. The Special Issue topics cover all aspects of hydrogen energy, including but not limited to energy fundamentals, production, storage, transmission, applications as an energy carrier, conversion systems, as well as the safety and feasibility of the infrastructure for the transport and final use of hydrogen. All papers related to current problems, new solutions, modelling and simulations, and experiments in all relevant disciplinary areas are welcome.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
