## Stylistic Design Engineering (SDE)

Guest Editors:

**Dr. Leonardo Frizziero**

Department of Industrial  
Engineering, University of  
Bologna, 40126 Bologna, Italy

**Prof. Dr. Giampiero Donnici**

Faculty of Mechanical  
Engineering, University of  
Bologna, 40126 Bologna, Italy

Deadline for manuscript  
submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

This Special Issue is dedicated to the deepening of research and case studies, related to the issue of innovative design, not only from a technical and engineering point of view, by tackling innovative solutions, but also aesthetically. In particular, the SDE (or the Ramacciotti method) is able to systematize the design process of innovative products and reduce their costs. The industrial challenges of innovation, in form and functionality, can be overcome precisely through the use of the SDE methodology, ensuring that beautiful aesthetic projects are carried out systematically, and with low costs. Possible points of interest and development:

SDE—Stylistic design engineering (or the Ramacciotti method) applied to the design of innovative products;  
QFD applied to the design of innovative products;  
TRIZ applied to the design of innovative products;  
Benchmarking applied to the design of innovative products;  
Top-flop analysis for the design of innovative products;  
Design for disassembly for maintenance;  
4.0 Digital prototyping (augmented reality);  
4.0 Physical prototyping (additive manufacturing).
