

## Special Issue

# Innovative Applications of Smart Machines in Agriculture

### Message from the Guest Editors

We invite researchers to contribute to this Special Issue, "Innovative Applications of Smart Machines in Agriculture", which brings together cutting-edge research and comprehensive analyses on the development of intelligent machines applied to the agricultural environment, from soil to plant development. Our focus ranges from sensor installation to instant data collection, processing, prototypes, simulations, modified components, and integrated models with machine learning and processes. We are pleased to invite researchers worldwide to contribute original research and review articles. The presentation of these advances over time will demonstrate intelligent machines' transformative impact on food cultivation and their contribution to food security.
