

Special Issue

New Advances and Applications in Biosensors for Biomolecules and Biochemicals

Message from the Guest Editors

Biosensors have garnered considerable attention in recent years, both in academia and industry. One of the main applications for biosensors is the detection of biomolecules or biochemicals that are early indicators of diseases or other biological hazards. Biosensors can also be used in diverse applications such as environmental monitoring, food safety, defense, drug discovery, and implantable devices, to name a few. Because of this wide range of applications, biosensing technologies have become ubiquitous and are not confined to a specific niche. Our Special Issue aims to showcase the latest research in biosensor techniques based on the principles of electrochemistry, optical, piezoelectric, thermal, chemical, etc. This Special Issue will also cover sensor modification techniques based on biomolecules such as enzymes, antibodies, nucleic acids, and other affinity molecules. Finally, this Special Issue will allow researchers in the community to share their work on biosensor fabrication, in vitro and in vivo application, and biosensor instrumentation that encompass the detection of a variety of target biomolecules and biochemicals.

About the Journal

Message from the Editor-in-Chief

Eng (ISSN 2673-4117) is an international, peer-reviewed open access journal which publishes original papers, critical reviews, rapid communications, technical notes, and discussions on all areas of engineering.

Editor-in-Chief

Prof. Dr. Antonio Gil Bravo

INAMAT²-Departamento de Ciencias, Edificio de los Acebos,
Universidad Pública de Navarra, Campus de Arrosadía, 31006
Pamplona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, Ei Compendex, EBSCO and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q2 (Engineering (miscellaneous))
