Special Issue

Green Engineering for Sustainable Development

Message from the Guest Editors

Sustainable development is of primary importance as the key to future use and management of finite world resources. Sustainable development is a way of organizing society so that it can exist in the long term, considering the needs of the present without compromising the ability of future generations to meet their own needs. Green Engineering is defined as the design, commercialization, and use of processes and products, which are feasible and economical, while minimizing the generation of pollution at the source and the risk to human health and the environment.

Green Engineering is a broad field including various topics. The aim of this Special Issue is to highlight the progress on the topics of green engineering, from energy efficiency and sustainability to biobased chemicals and plastics from renewable resources.

Guest Editors

Prof. Dr. George Z. Papageorgiou

Prof. Dr. Maria Founti

Dr. George N. Nikolaidis

About the Journal

Message from the Editor-in-Chief

Eng (ISSN 2673-4117) is an international, peer-reviewed open access journal which publishes original papers, critical reviews, rapid communications, technical notes, and discussions on all areas of engineering.

Editor-in-Chief

Prof. Dr. Antonio Gil Bravo
INAMAT^2-Departamento de Ciencias, Edificio de los Acebos, Universidad Pública de Navarra, Campus de Arrosadía, 31006 Pamplona, Spain

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within ESCI (Web of Science), Scopus, Ei Compendex, EBSCO and other databases.

Journal Rank:
JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q2 (Engineering (miscellaneous))
