

Special Issue

Emerging Technologies for the Treatment and Reduction of Pollutants in Industrial Processes

Message from the Guest Editor

This Special Issue aims to showcase the latest advancements and case studies in emerging technologies for the treatment and reduction of pollutants in industrial processes. We invite contributions that highlight examples of industrial processes that have been adapted to meet current environmental requirements, including sustainable and green industrial processes, alternative processes, and circular economy practices. Our focus will be on technologies and strategies that minimize polluting emissions, enhance the purification of pollutants, and promote the use of more sustainable raw materials. Contributions may cover a range of topics, including, but not limited to, the following: novel waste treatment technologies, advanced oxidation processes, membrane separation techniques, bio-based materials, and sustainable energy solutions. By presenting these cutting-edge developments, we aim to inspire further innovation and collaboration in the field, ultimately contributing to the creation of a more sustainable and environmentally friendly industrial sector. Thank you for your consideration.

About the Journal

Message from the Editor-in-Chief

Eng (ISSN 2673-4117) is an international, peer-reviewed open access journal which publishes original papers, critical reviews, rapid communications, technical notes, and discussions on all areas of engineering.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, Ei Compendex, EBSCO and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q2 (Engineering (miscellaneous))
