

Special Issue

Advanced Research in Hydraulics and Water Engineering

Message from the Guest Editors

MDPI's Advances in Hydraulics and Water Engineering journal publishes original, stimulating and high quality articles on hydraulic and water engineering in engineered and natural systems. Applications of hydraulics and water engineering include the design of hydraulic structures, such as bridges, spillways, breakwaters and dams, waterways management, such as flood protection and erosion protection and environmental management. Renewable energy and hydroelectric-power development, irrigation and drainage, water supply, are some examples of applications of water engineering involving the utilization of water for beneficial purposes. Recently, concern for preserving our nature and environment has increased the importance of water management and planning.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Eng (ISSN 2673-4117) is an international, peer-reviewed open access journal which publishes original papers, critical reviews, rapid communications, technical notes, and discussions on all areas of engineering.

Editor-in-Chief

Prof. Dr. Antonio Gil Bravo

INAMAT²-Departamento de Ciencias, Edificio de los Acebos,
Universidad Pública de Navarra, Campus de Arrosadía, 31006
Pamplona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, Ei Compendex, EBSCO and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q2 (Engineering (miscellaneous))
