# **Complex Dynamic System Modelling, Identification and Control**

Guest Editors:

#### Message from the Guest Editors

Prof. Dr. Quanmin Zhu

Dr. Giuseppe Fusco

Prof. Dr. Jing Na

Dr. Weicun Zhang

Prof. Dr. Ahmad Taher Azar

Deadline for manuscript submissions: closed (31 July 2021)

- This Special Issue is a forum for presenting new and improved insight, methodologies, and techniques of MIC for complex systems that are challenging for research and (potential) significant for a wide range of applications in the real-world natural and engineering domains. Fundamentally, the papers should justify why the works have not been undertaken by the other colleagues and what the bottleneck issues have been the barriers for such research progression and applications.
  - complex human-made and natural systems
  - system identification
  - nonlinear adaptive control
  - robotic systems
  - artificial intelligence for MIC
  - immerging methodologies and algorithms for MIC
  - entropy-oriented MIC
  - case studies
  - and applications

### Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
