# **Graph and Network Entropies**

Guest Editor:

# Prof. Dr. Ernesto Estrada

Department of Mathematics & Statistics, University of Strathclyde, Glasgow G11XQ, UK

Deadline for manuscript submissions: closed (30 June 2018)

### Message from the Guest Editor

Dear Colleagues,

Graphs are now ubiquitous to study quantum and molecular systems, macromolecules and their interactions, socio-economic and ecological systems, and infrastructural and technological systems, among others. This Special Issue focuses on original and new research results concerning the development and applications of entropies and entropy-like measures for studying graphs and networks. We welcome submissions addressing fundamental and methodological (mathematical, information, thermodynamics, statistical mechanics, and others) aspects of graph/networks entropies, applications of entropies to the study of structural and dynamical processes in graphs and networks in any area of applications, as well as those on more specific topics that illustrate the broad impact of entropy-based techniques in understanding the complexity of the systems represented by graphs and networks. We will consider computationallyoriented works when they give rise to a clear understanding of the structural and dynamical processes under consideration

Prof. Dr. Ernesto Estrada

### Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
