# **High-Entropy Materials**

Guest Editors:

#### Prof. Dr. Hyoung Seop Kim

Department of Materials Science and Engineering, Pohang University of Science and Technology (POSTECH), Pohang, Korea

#### Prof. Dr. Jien-Wei Yeh

Materials Science & Technology Building R505, National Tsing Hua University, Hsinchu 30013, Taiwan

Deadline for manuscript submissions: closed (30 November 2019)

### Message from the Guest Editors

"High-entropy alloys" has become an exciting and vibrant field of materials science and engineering since the concept was first proposed more than a decade ago. Symposia, conferences and workshops on topics of highentropy alloys or high-entropy materials (HEMs) are being held, and a rapid increase in the number of journal publications and citations is evident. This design concept allows compositions beyond the scope of traditional materials, and offers unprecedented properties and opportunities for a wide range of structural and functional applications. The Special Issue will hence provide the latest research results and a state-of-the-art overview of technology in the exciting and rapidly evolving field of HEMs. This Special Issue welcomes all submissions from authors in the field of high-entropy materials.

### Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
