Statistics, Bowling Green State  
University, Bowling Green, OH  
43403-0206, USA

**Prof. Dr. Hanfeng Chen**

Department of Mathematics and  
Statistics, Bowling Green State  
University, Bowling Green, OH  
43403-0206, USA

Deadline for manuscript  
submissions:

**30 June 2024**

### Message from the Guest Editors

This Special Issue calls for papers in, but not limited to, the following areas:

- Statistical modeling methods for high-dimensional data and applications (e.g., regression, mixed models, mixture models, generalized linear models);
- Model selection for high-dimensional data and applications;
- Information theory and applications (e.g., decision optimization, clustering, classification);
- Dimensionality reduction methods and applications in different real datasets;
- Variable selection based on feature screening for high-dimensional data (e.g., bioinformatics, medical informatics, psychology, economics);
- Statistical learning methods for high-dimensional data and applications (e.g., Lasso, splines, trees, random forests, neural networks, clustering, classification);
- Applications based on Bayesian inference for high-dimensional data;
- Statistical computing for high-dimensional data.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
