Theoretical and Applied
Mechanics, University of Lorraine,
2 av. de la Forêt de Haye, CEDEX,
54504 Vandoeuvre, France

Deadline for manuscript
submissions:

closed (15 December 2019)

Message from the Guest Editor

Engineering thermodynamics has been advancing, particularly since the sixties. A first step was the consideration of endoreversible engines, and reverse corresponding configurations. These phenomenological approaches are currently being improved, considering dissipative mechanisms, in order to represent more precisely the global performance of the system. More and more complex systems are being considered (for example, cascades, co- or trigeneration).

The optimization of systems and processes requires clearly defining the objectives and constraints applied to them. The efficiency concept is central to that. Three main aspects are related to particular fundamentals or engineering situations:

- fundamental physical criteria;
- environmental concerns;
- economic concerns.

Special Issue

entropy

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University
at Albany, 1400 Washington
Avenue, Albany, NY 12222, USA

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
