Institute for Energy Engineering,
Technische Universität Berlin,
Berlin, Germany

Deadline for manuscript
submissions:

closed (15 October 2021)

Message from the Guest Editor

The evaluation and improvement of energy-conversion and energy-intensive chemical systems from the perspectives of their sustainability (thermodynamics, economics, and environmental impacts) require a deep understanding of: The real thermodynamic inefficiencies and the processes that cause them The costs and environmental impact associated with equipment and thermodynamic inefficiencies as well as the connection between those three important factors. To reduce the thermodynamic inefficiencies, costs, and environmental impacts in a system, we must understand their process of formation. Exergy-based methods reveal the location, the magnitude, and the sources of inefficiencies, costs, and environmental impact and allow us to study the interconnections between them and the real potential for improvement. The input from these methods is useful in developing strategies for improvement and optimization of energy-conversion and energy-intensive chemical systems.

entropy

an Open Access Journal by MDPI

Editor-in-Chief

Department of Physics, University
at Albany, 1400 Washington
Avenue, Albany, NY 12222, USA

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
