## Information Theoretical Security and Privacy

Guest Editor:

**Dr. Zouheir Rezki**

Department of Electrical and  
Computer Engineering, University  
of California Santa Cruz, Santa  
Cruz, CA 95064, USA

Deadline for manuscript  
submissions:

**closed (26 April 2022)**

### Message from the Guest Editor

Information-theoretical security is a new, groundbreaking approach to provide privacy and security for wireless communication networks, by exploiting the unique characteristics of wireless communication channels. Information-theoretical security uses advanced coding, communication, and signal processing techniques to provide confidentiality, privacy, authentication, and integrity.

Original contributions are solicited in topics of interest to include, but not be limited to, the following:

- Secure methodologies and architectures for mobile and wireless networks
- Secure signal processing
- Secure fundamental theory
- Secure advanced spatial diversity techniques
- Secure resource
- Multi-user information theoretical security
- Cross-layer designs for security
- Security and privacy in the Internet of Things
- Security and quantum communications
- Trust, security, and privacy in e-government, e-systems, and social networking
- Trust, security, and privacy in cloud computing, performance of practical testbeds for PHY security
- Secure machine learning
- Binning methods for private authentication
- Privacy methods in database search algorithms

## Editor-in-Chief

### **Prof. Dr. Kevin H. Knuth**

Department of Physics, University  
at Albany, 1400 Washington  
Avenue, Albany, NY 12222, USA

## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
